

United Nations University Program on Digital Technology and Sustainable Development

Groundbreaking UNU Collaboration

One of its kind, this program joins forces of UNU Macau, UNU-MERIT, and UNU-EHS to deliver a unified program that integrates the latest research in digital technology, policy innovation, and sustainability - reflecting the UN's approach to the Sustainable Development Goals.

International Immersion Across 3 Countries

Spanning Macau, Maastricht, and Bonn, the program offers a rare cross-continental experience, immersing participants in diverse academic cultures and institutional settings to deepen global understanding and foster intercultural exchange.

Multidisciplinary Perspectives on Global Leadership

Leveraging the distinct strengths of each UNU institute, the program equips participants with a holistic leadership toolkit, combining technical, policy, and environmental insights to tackle complex global challenges through collaborative, action-oriented learning.

Kickstart Your Path to Digital Technology and Sustainable Development.
