

United Nations University Program on Digital Technology and Sustainable Development

The UNU-DTSD Program

The UNU-DTSD Program is a unique program that builds on an intensive collaboration between UNU-MACAU (Macau), UNU-MERIT (Maastricht, The Netherlands) and UNU-EHS (Bonn, Germany). The Program is designed for scholars currently enrolled in higher education institutions or in early career research positions.

FACTS:

- Multi-disciplinary perspectives - Digitalization & AI, Public Policy & Innovation, and Sustainability through 3 top UN Institutes across 3 countries.
- 2-weeks intense program
- Support in boosting career development, gaining global expertise, and preparing for a future in international organizations.
- Expansion of both professional and social network globally

APPLY BEFORE:

- 1 November 2025

cdo@merit.unu.edu

The UNU-DTSD Program trains participants in:

- Understanding the structure of the UN and its entities
- Understanding the impact of Digitalisation and AI on societies
- Providing the basic understanding of AI and the ability to use it
- Having the ability to link the concept of Public Policy to Digitalisation and Sustainability reach development
- Gaining experience working in a team and co-create solutions for global pressing issues,
- Completing a group work with the guidance of the UNU researchers and experts, and present that to the cohort and experts.
